Real-Time Tracking

We're redefining on-demand towing by putting efficiency and reliability first. Our platform seamlessly integrates with Google Maps to enable real-time tracking, automated dispatch, and smart fleet optimisation. This means faster response times, reduced wait periods, and a smoother experience for both customers and tow truck operators. The result? A safer, more convenient service that's also environmentally friendly.

Platform as a Service

Why build from the ground up? Our location-based platform is ready to support your business. Easily customize and integrate our proven technology to fit your needs, with help from our expert developers. Fast, flexible, and built to grow with you.

Secure Booking

Fast, Reliable Towing, Right from Your Cell Phone!

Subscribe to on-demand towing and recovery services with just a few taps. Our secure booking platform connects you instantly to our trusted fleet, no third parties, no delays. All services are handled by our own professionally managed tow trucks, giving you peace of mind and dependable support whenever you need it.

Safe & Secure

Know Who's Coming, Every Time! For added peace of mind, members receive a photo of the assigned driver and the truck's license plate number. You can track their location in real time and communicate directly with the driver until they arrive, ensuring a safe, transparent, and reassuring experience from start to finish.

FREQUENTLY ASKED QUESTIONS SECTION

How much does towing or roadside assistance cost? –

Prices vary depending on the type of service, distance, time of day and situation. The mobile app will calculate and display the cost before you confirm and pay for the service.

5. Please update this text

Pricing depends on the service type, distance, time of day, and specific circumstances. Our mobile app calculates and shows the exact cost upfront, so you know the price before you confirm and pay.

We're on a mission to power LED360's Drivers.

At LED360, we're on a mission to empower drivers and transform how businesses manage vehicle operations. Our platform includes **built-in telematics** integrated directly into our towing and roadside assistance mobile app to support real-time tracking, data insights, and smarter decision-making.

What does that mean for you? Using advanced sensors from your mobile device, our telematics system captures key data like driving behavior, vehicle activity, location, and speed. This helps businesses monitor performance, ensure safety, and streamline operations, all from a single, easy-to-use platform.

Designed for industries including:

- Fleet Management
- Insurance & Automotive
- Mobility & Smart City Solutions

With LED360's telematics, your business gains:

- ✓ Real-time visibility into vehicle and driver activity
- ✓ Improved route efficiency and cost control
- ✓ Enhanced customer service and response times
- ✓ A competitive edge through data-driven innovation

Smarter insights. Better decisions. Powered by LED360.

Privacy is everywhere, trust is fundamental

We solved a major concern for companies and their app users; providing hyper-personalized experiences while ensuring privacy. Thanks to edge computing, we are moving towards making sure raw data never leaves the user's phone and is processed directly on-device. Also, respecting privacy by design, we only use data that will contribute to building insights, nothing more.

You own all the data.

We don't keep your data.

We don't sell your data.

12 Please replace wording with the wording below

Privacy is at the Core of Everything We Do

At LED360, we believe that trust is earned, and protecting user privacy is non-negotiable. We've addressed one of the biggest challenges facing modern platforms: delivering hyper-personalized services without compromising personal data.

Thanks to **edge computing**, we ensure that sensitive information is processed directly on the user's device. Raw data stays local, never transmitted to external servers, minimizing risk and maximizing control.

Our platform follows a **privacy-by-design** approach. That means we collect only the data necessary to generate meaningful insights, nothing more, nothing invasive. It's a smarter, safer way to power location-based services while respecting every user's right to privacy.

Trust LED360 to deliver intelligent solutions without sacrificing your security.
